

Creazione di una Solution QuantLib personalizzata

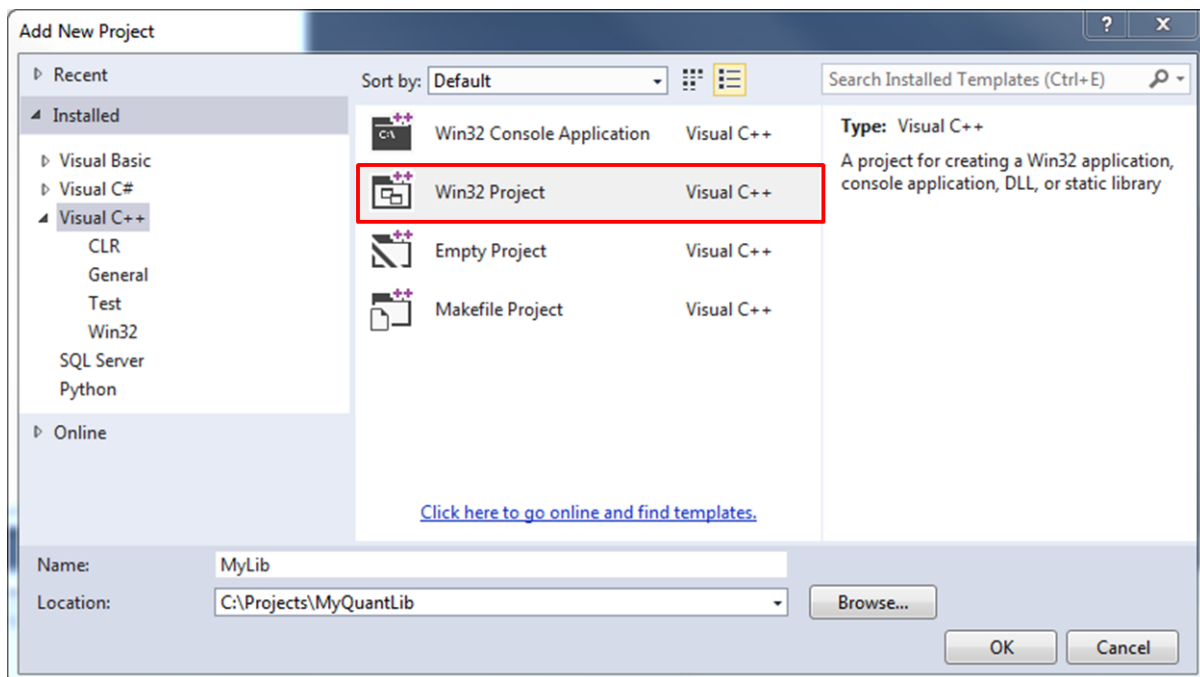

Aprire Visual Studio e selezionare FILE -> New Project, quindi scegliere Visual Studio Solutions

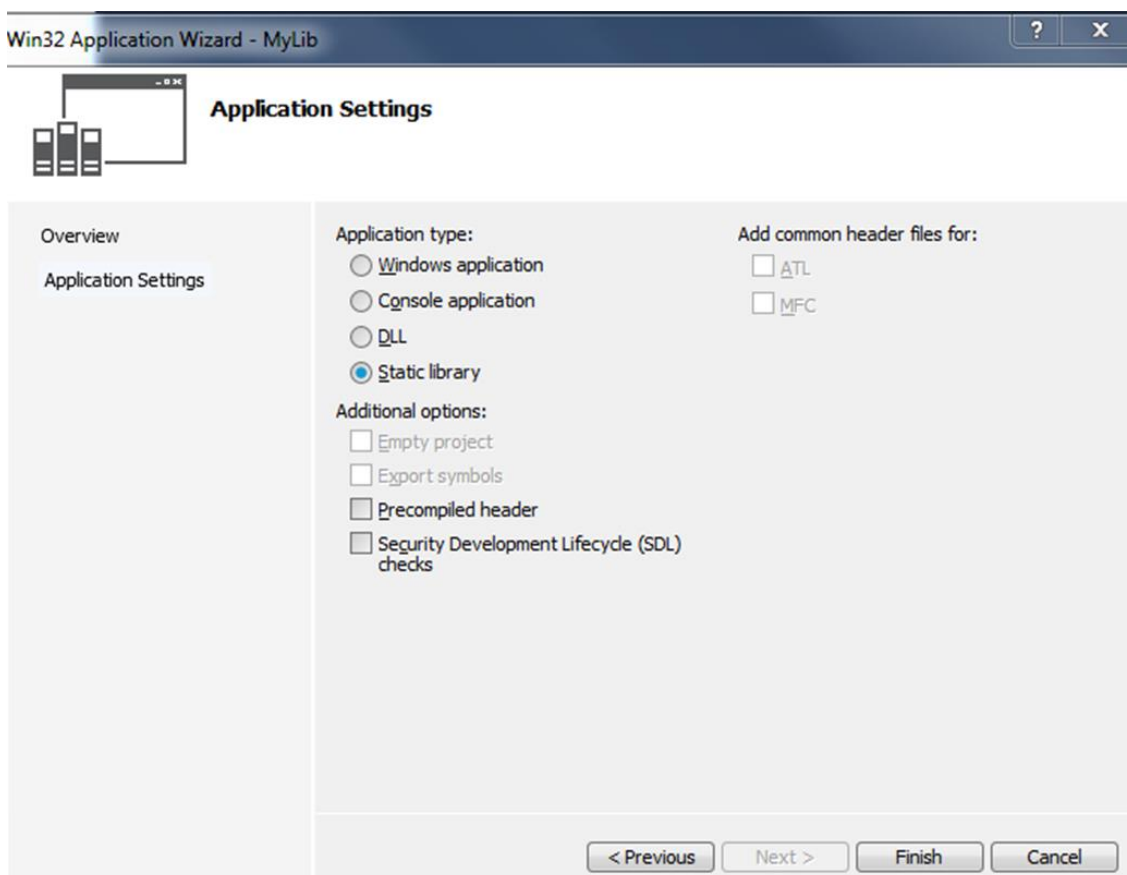

Tasto destro su Solution, quindi Add -> Existing Project scegliere QuantLib.vcxproj nella cartella QuantLib

Tasto destro su Solution, quindi Add -> New Project e selezionare Win32 Project

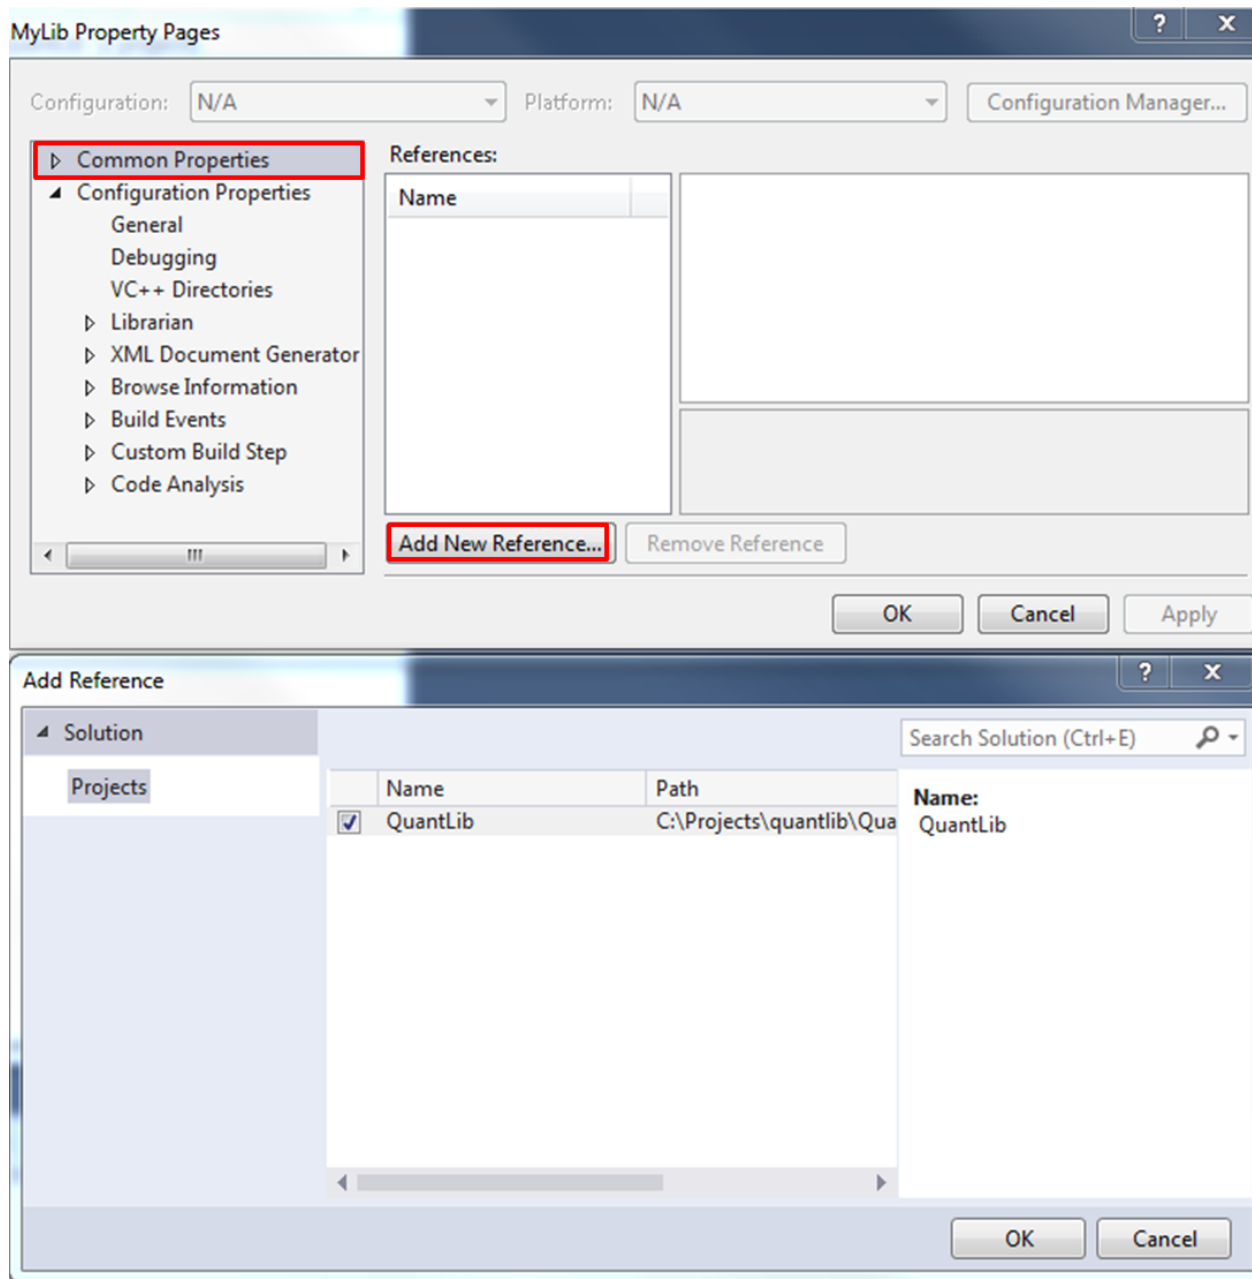

Selezionare Next e scegliere Static library (NO Precompiled header e Security Development Lifecycle)

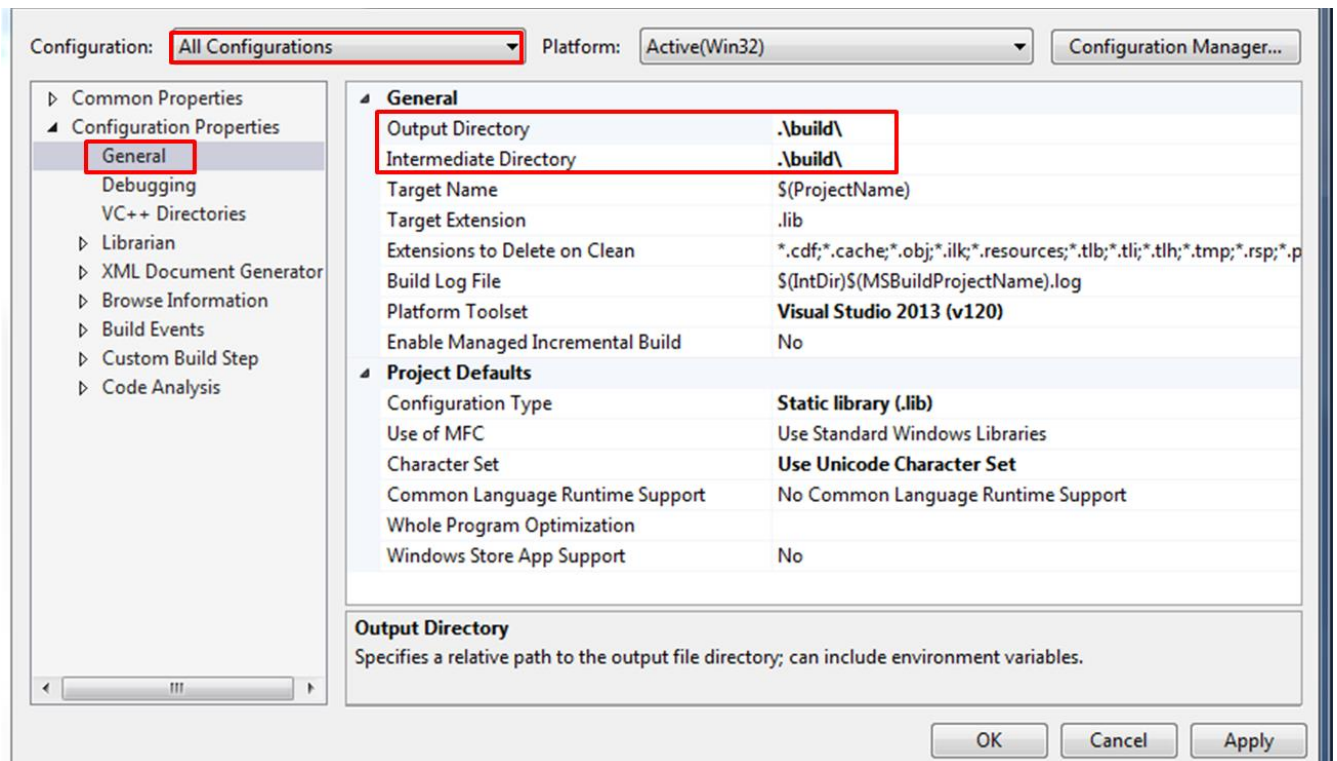

Tasto destro sul progetto creato ("MyLib") selezionare Properties e impostare:

- 1) Common Properties -> Add New Reference -> flag su QuantLib

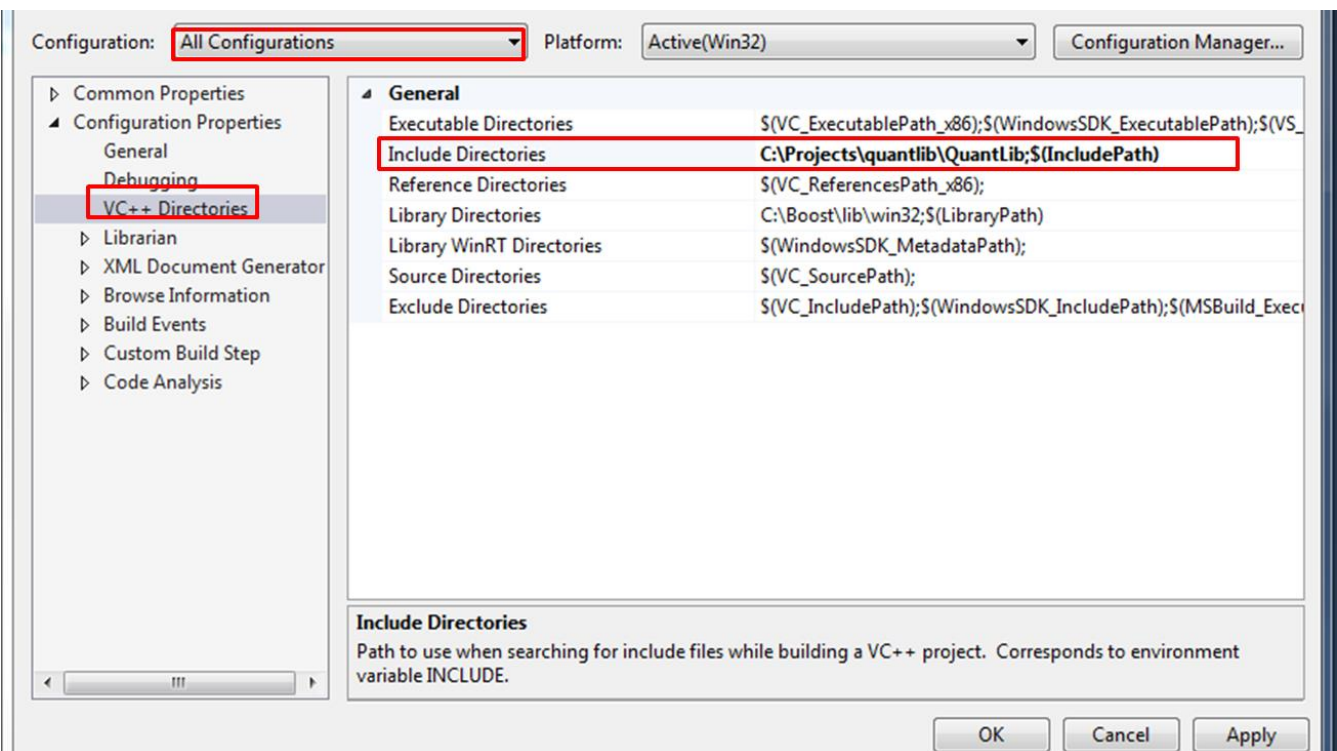

Quindi per tutte le configurazioni (All Configurations)

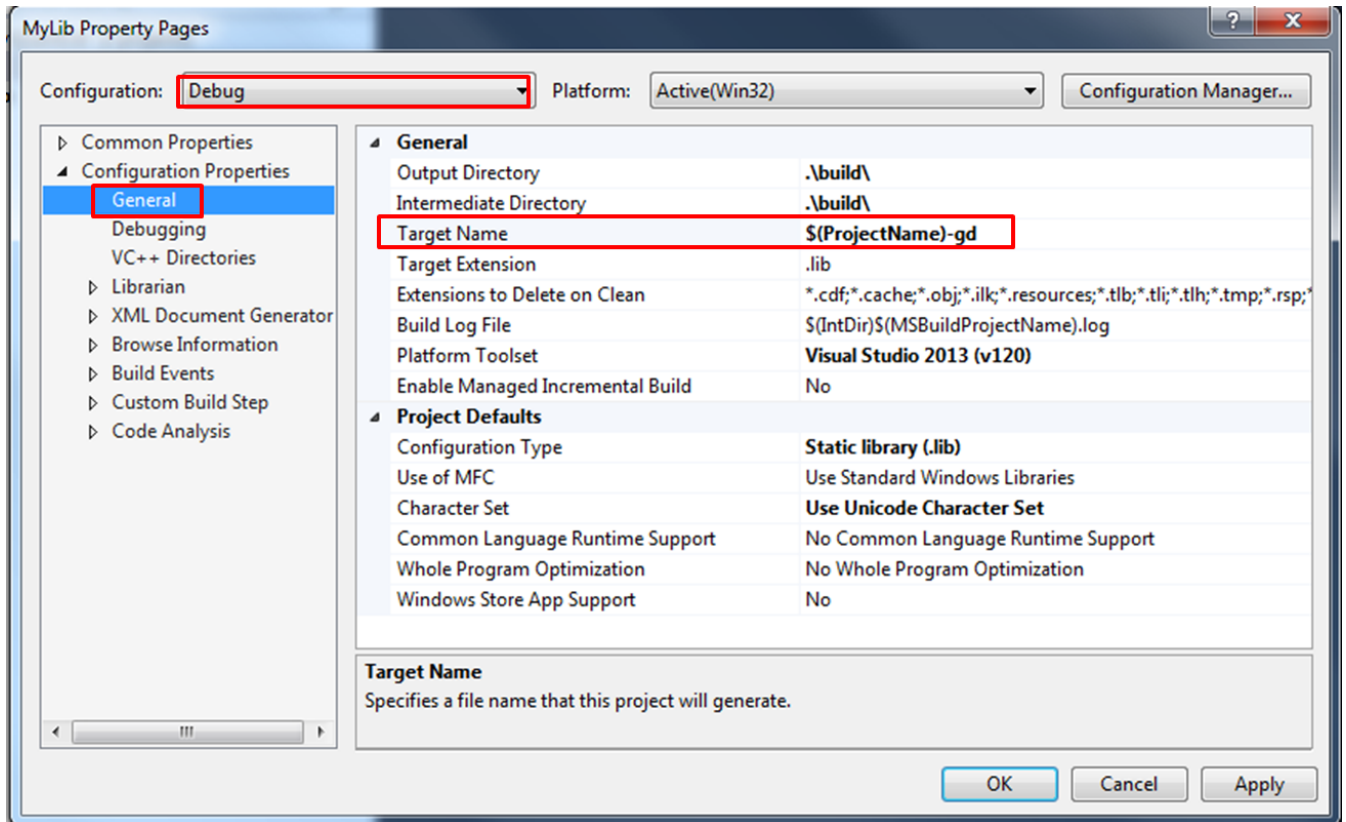

- 2) Configuration Properties -> General

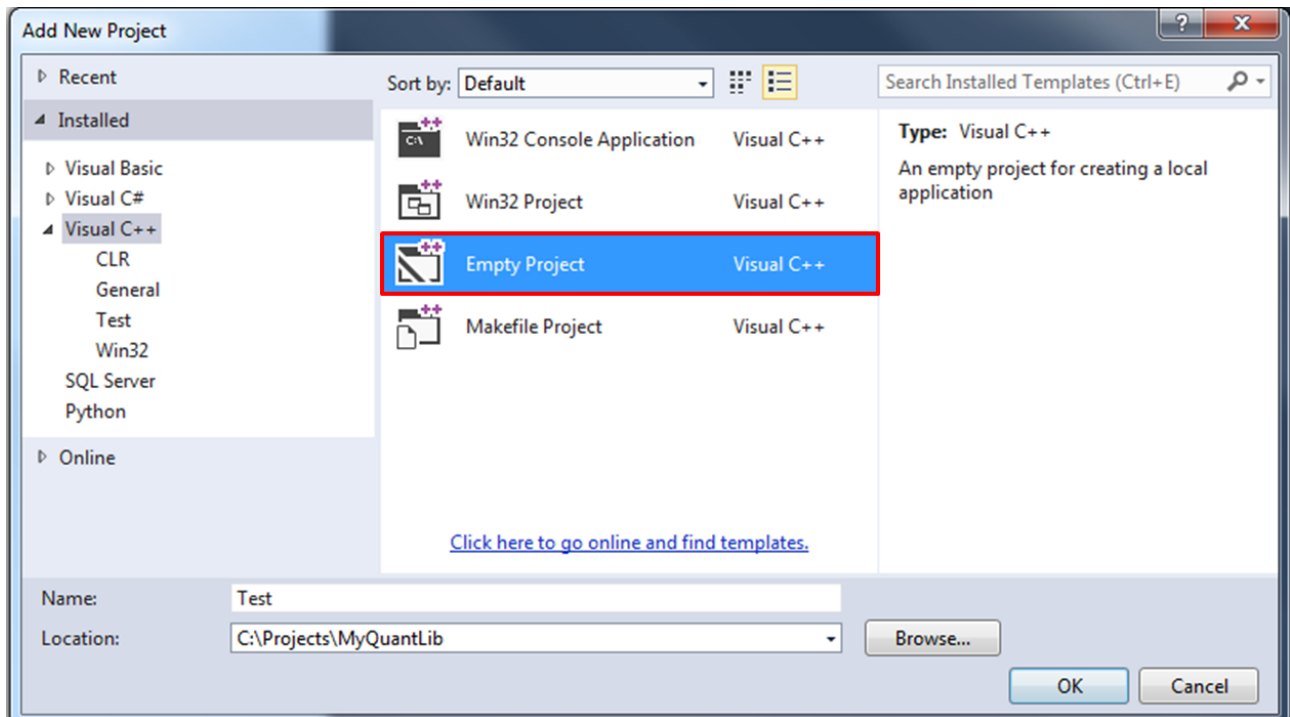

3) Configuration Properties -> VC++ Directories

4) (solo per Debug) Configuration Properties -> General

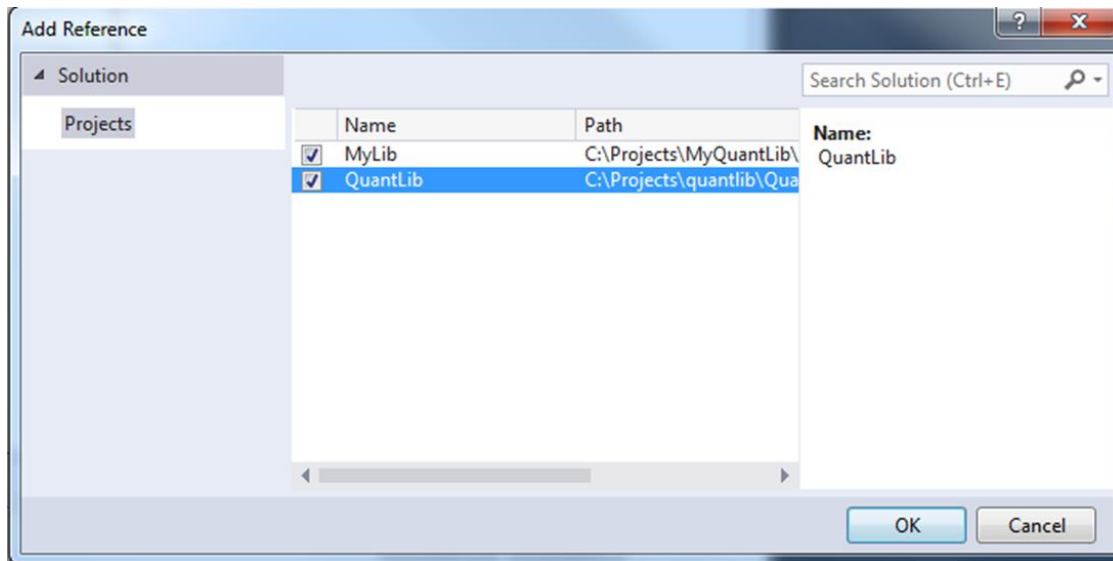

Tasto destro su Solution, quindi Add -> New Project e selezionare Win32 Project

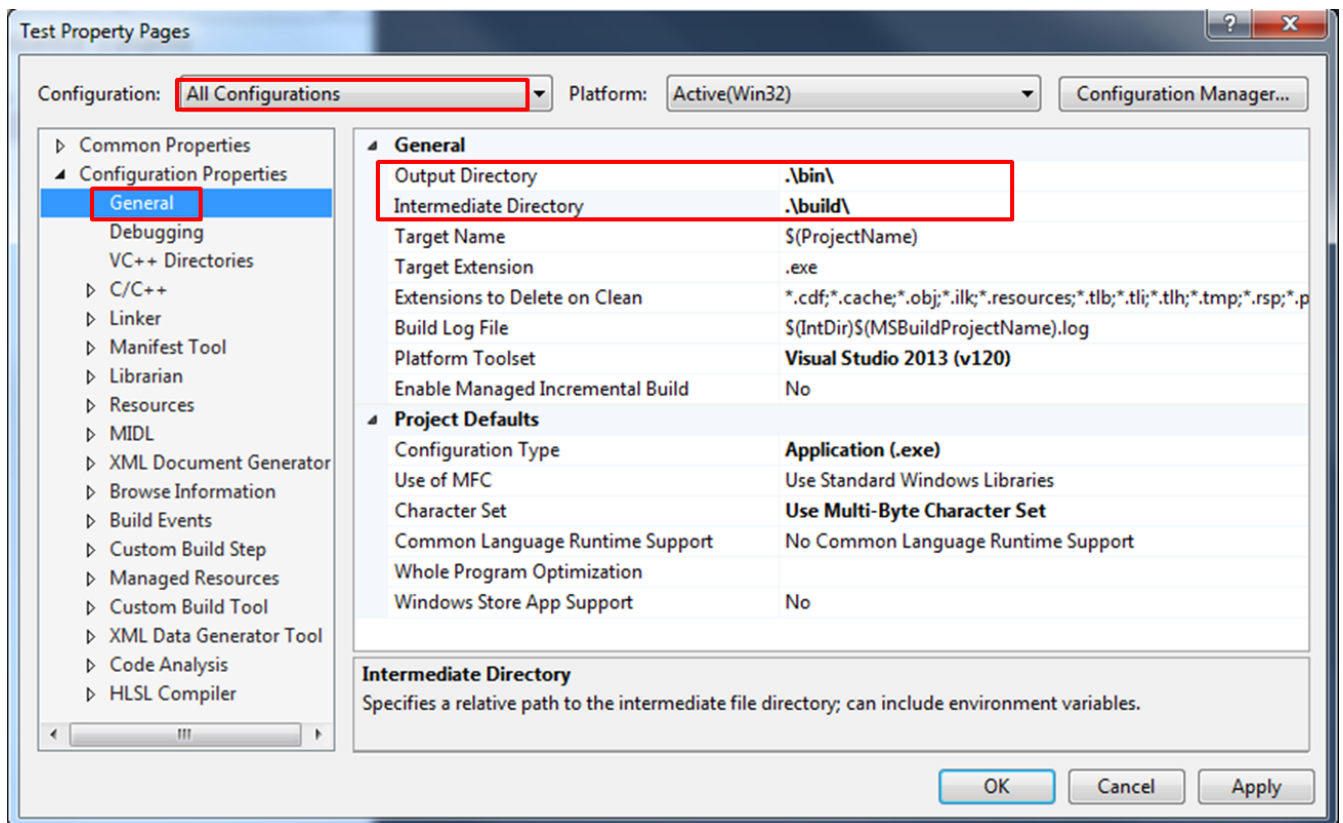

Tasto destro sul progetto creato ("Test") selezionare Properties e impostare:

- 1) Common Properties -> Add New Reference -> flag su QuantLib e su MyLib

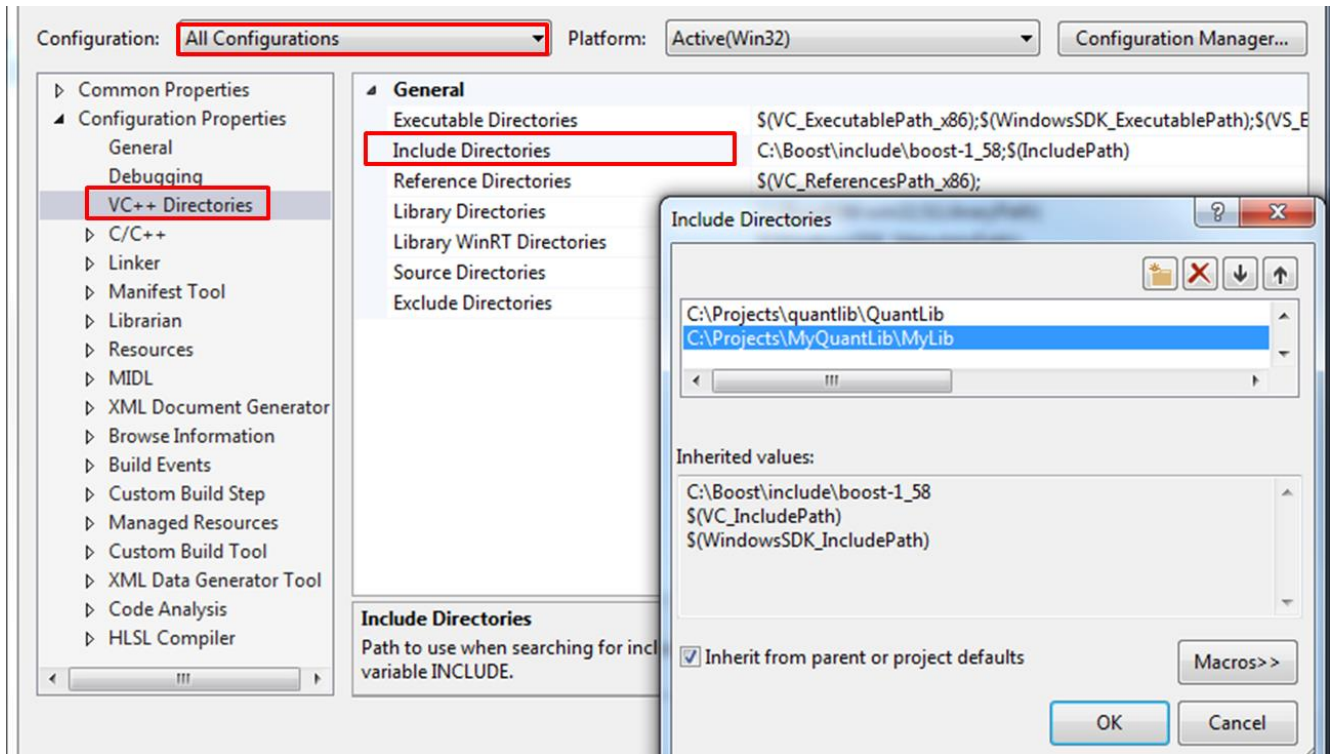

Quindi per tutte le configurazioni (All Configurations)

- 2) Configuration Properties -> General

3) Configuration Properties -> VC++ Directories

4) (Solo per Debug) Configuration Properties -> General
